

# WOOD CHIPPER

## REQUIREMENTS

## FEATURES & BENEFITS

Wood Chipper: Loader must be equipped with a 7-Pin Control Kit.

- The Bobcat® Wood Chipper attachment is ideal to grind branches, trees and limbs, reducing branch volume from 10 to 1.
- Grinds branches and trees up to 13cm in diameter.
- The discharge chute can be rotated 360-degrees for maximum angle positioning.
- Operate the wood chipper from the cabin or using the Bobcat® Remote Attachment Control (RAC) system. This allows the operator to start or stop the loader's engine and chipper rotation when standing beside the attachment.
- The unit comes with an automatic hydraulic feed, with speed control and load sensing system for best performance and constant flow.
- Large diameter, high torque feed roller for increase efficiency and productivity.
- Variable speed feed drive for adjusting the feed rate with a reversible option in case of plugging.
- Dual mounting locations, which allows material to be fed from the front or right side of the loader.

**Description:** The Bobcat® wood chipper attachment grinds branches, trees and limbs, reducing branch volume 10 to 1. Unlike a pull-type wood chipper, the wood chipper attachment can easily be placed into backyards and remote areas with the manoeuvrability of a Bobcat® loader. Hydraulic power feed is included as standard equipment. It allows the feed roller to move branches into the wood chipper at a consistent speed so the operator can work safely and efficiently.
